1. The Kamenica nad Cirokou (R 49/E 86) airfield, about 5 kilometers east of Humenne (R 49/E 86), is bordered on the south by the railroad line to Snina (R 49/E 96) and by the Cirocha River on the north. The Kamenica railroad station lies to the south, in the middle of the long side of the field. Wooded hills are 500 meters north and south of the airfield.
2. The landing field, about 1,000 x 1,500 meters, is sodded. Until the end of the war the field was used as an aircraft jump-off base for firing practice against ground targets. A hangar at the field was being razed. The administration building and billets were intact.
3. No occupation or indication of the field was observed while flying over it.
4. The landing field seemed serviceable.
